

# FAST LANE PLATFORM-AS-A-SERVICE

Deploy training to all your  
audiences at scale!

**Centralize**  
training resources  
and support for  
your all your  
audiences

**Analytics**  
to track learner  
activity and  
performance

**On Demand**  
learning available  
anytime, anywhere

# A UNIQUE PLATFORM SOLUTION

Fast Lane's PaaS solution allows you to centralize learning resources in a branded portal and provide easy access to all your audiences.

With 99.99% uptime, your training material is guaranteed on a secure cloud infrastructure. Provide your employees, partners, and customers with a protected, branded learning campus that utilizes our unique infrastructure.

Based on Open edX, Fast Lane LIVE is a complete end-to-end cloud learning platform solution that gives users seamless access to a variety of e-learnings, virtual labs, group learning, online mentoring and other services - anywhere, anytime, and any device.

Our platform can be a standalone solution or combined with our Learning-as-a-Service offering to deliver interactive learning paths to your team.

## Reporting & Analytics

Keep track of your educational goals and monitor learner performance. Reporting shows management precisely where each learner is within their personal learning journey - helping you stay on target to drive adoption and meet project timelines and goals.

## E-Commerce

Offer easy payment options to allow access to your content. We can provide international E-Commerce capabilities and flexible payment services for you or your customers.

## LMS & Integration

Integrate our platform into your existing environment. As an authorized Learning Partner of many high-end technology companies, we can offer you seamless access to a unique catalogue of hundreds of learning titles to meet your educational goals.

# RETHINK THE WAY YOU PROVIDE CONTENT

## Scalable Hosting

Host your own custom content alongside multi-vendor training

## Learning Paths

Access tailored content quickly and provide your learners with structured paths to help them succeed

## Different Entries

Create different portals customized for your audiences, from employees to partners to consumers

## Multiple Types of Content

Courseware can consist of MOOCs, eLearning, VODs, and other performance tools

## TRAIN SMARTER

Advanced analytics and reporting capabilities give you key insights into learner activity and training performance.

## CUSTOMER SUCCESSES WITH PAAS

### Lakeside

Fast Lane provided a central learning platform to host Lakeside's existing content (comprehensive trauma-informed training and services for professionals, educators, organizations, and systems of care). This allowed access to relevant courses and information in self-paced format on a variety of devices, with an E-Commerce-enabled portal. Phase 2 included mobile app development.

### Gigamon

For this customer, Fast Lane built a branded platform to host elearning content for internal and external audiences with subscription tiers and E-commerce. The platform benefits included just-in-time learning, improved organizational performance, scalability, and increased speed of information dissemination.
